

SEACRET
MINERALS FROM THE DEAD SEA

WE ARE PROUD TO PRESENT
BIO SHIELD COMPLEX

SEACRET Bio Shield Complex product line focuses on:

3 main ingredients:

FERMENT 21™

Red Microalgae sulphated polysaccharide

Beta Glucan derivative

Addressing the visible signs of aging,
helping support skin's antioxidant defense.

Clean and safe formulas.

The new super-innovative Bio Shield Complex Series

Seacret Laboratories have combined a unique mineral-intensive Dead Sea ferment with the antioxidant powers of the harsh-water survivor green microalgae *dunaliella salina* – the result is a skin-adapting, skin-refining complex that helps to provide a unique antioxidant defense against environmental factors and the visible signs of aging.

BIO SHIELD COMPLEX

BIO SHIELD COMPLEX
Supercharged Moisture Lotion

BIO SHIELD COMPLEX
Supercharged Eye Cream

BIO SHIELD COMPLEX
Supercharged Moisture Cream

BIO SHIELD COMPLEX
Beauty Sleep Mask

Bio Shield Complex targets key factors that may cause visible signs of aging.

Environmental and psychological stress

Intrinsic aging, the natural process of skin aging

Super-charged antioxidant defense helps to protect the skin from environmental aggressors by combining 3 powerful ingredients

Helps enhance **skin revitalization** with the power of green microalgae *dunaliella salina* in a patent pending fermentation

Red Microalgae Polysaccharide

Helps protect against **environmental free radical scavengers** (antioxidant activity)

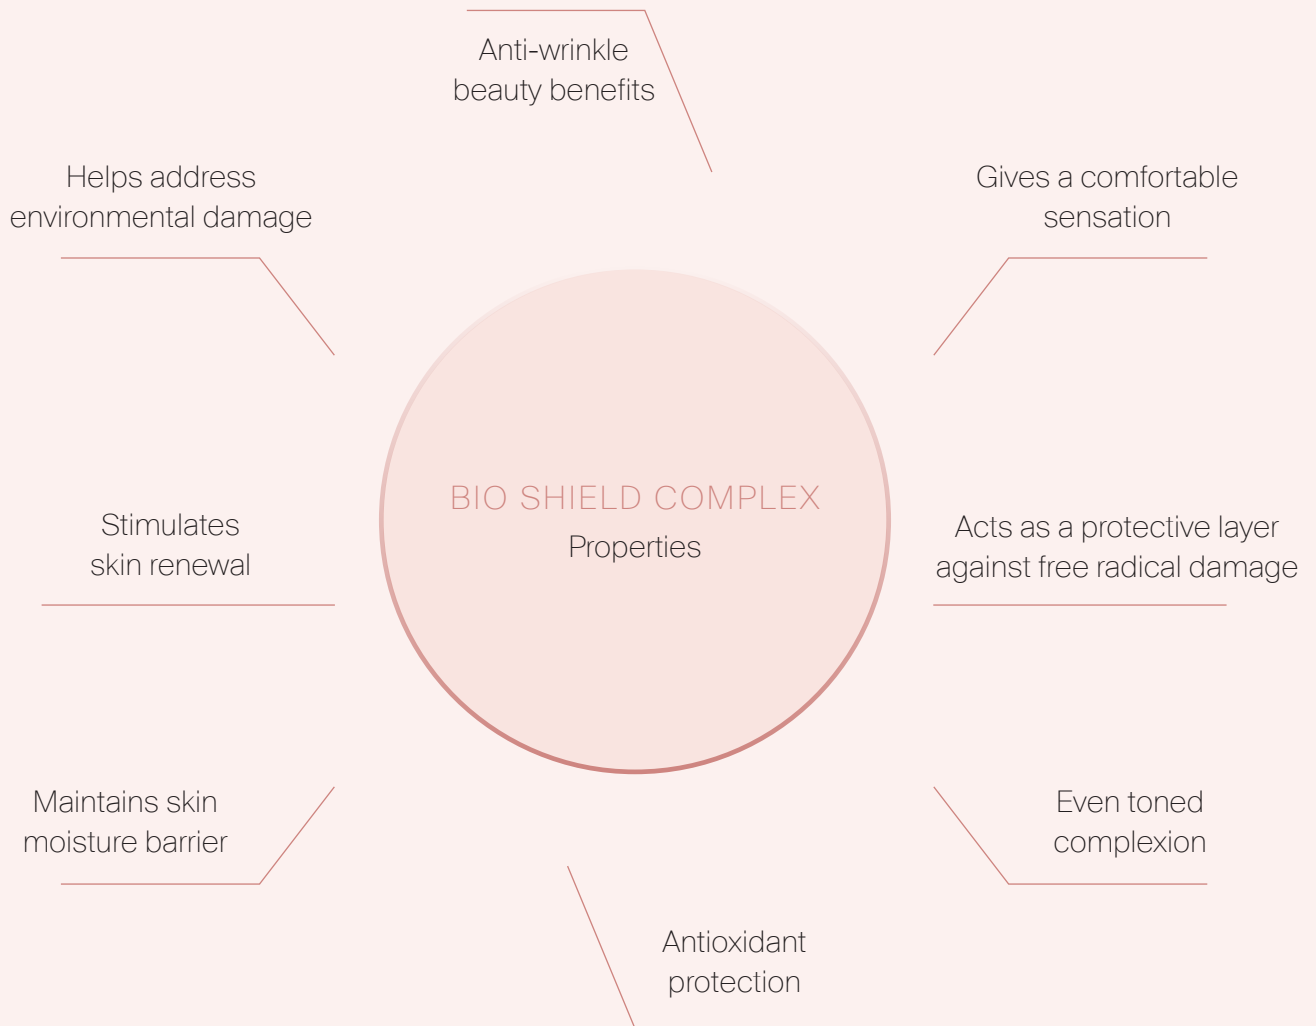

Beta Glucan derivative

Works twofold to soothe the skin and as an effective anti-ager to firm and plump the look of fine lines and wrinkles.

Main benefits

What is a fermentation process?

In cosmetics, the fermentation process consists of adding microorganisms to natural ingredients. These microorganisms release enzymes that break down the molecules in the raw material, which leads to the creation of new substances that benefit your skin.

The miracle of FERMENT 21™

FERMENT 21™ is a proprietary ingredient, groundbreaking formula in Seacret's new skincare line, the BIO SHIELD COMPLEX, which helps address the visible challenges of modern life stress and environmental aggressors working as a BEAUTY SHIELD..

Seacret Laboratories have invented a unique Dead Sea fermentation technology involving most resistant unicellular organism surviving in hyperlane water: microalga Dunaliella Salina. An antioxidant and carotenoid miracle, live Dunaliella Salina, when cultured under a precise bio-equilibrium, act like powerful microreactors to bio-transform Dead Sea minerals and nutrients.

FERMENT 21™ is a truly game-changing advance in Dead Sea minerals cosmetic technology.

Initial study results on FERMENT 21™

Helps create firmer looking skin

Optimization of collagen expression

Encourages skin renewal

Bio Shield Complex provides effective skin care that's also clean, green, and safe without harmful ingredients. All products successfully passed hypoallergenic tests and are suitable for sensitive skin.
