

**IMPORTANT REMINDER**

Seacret is very proud of our innovative Wellness by Seacret products. We are committed to bringing you supplements that provide you with high-quality nutritional benefits to support a healthy, active lifestyle.

As a company who strongly believes in doing the right thing and selling our products with the utmost integrity as required by federal, state and provincial regulations, here are some areas that are **very important** to follow:

**Wellness by Seacret products are NOT:**

NOT legally allowed to be recommended for children under the age of 12. If a customer should ask if their children may use the products, you must direct them to consult with their pediatrician.

NOT legally allowed to be recommended for pregnant or nursing women. If a customer should ask if they may use Wellness By Seacret products during pregnancy or while breastfeeding, please direct them to consult with their doctor.

NOT legally allowed to be recommended to anyone under a doctor's care (for which they are receiving any form of treatment) without first obtaining the doctor's express consent for use. Never interfere with patient doctor care or treatment.

**VERY IMPORTANT:**

Even if your doctor or medical advisor said it was okay, you must direct them to their own doctor, and you may not share your personal doctor's opinion or advice. (This includes special advice from Dr. Cohn).

Never make a claim that expressly or by implication suggests the Wellness by Seacret products have an effect on a specific disease, symptom of a disease or class of a disease. Our natural health products are strictly regulated. Even if you have a personal or Customer testimony of improvements you have had regarding a medical issue or disease you may not use it to sell Wellness By Seacret. Our Wellness By Seacret Natural Health products and Skincare products are not intended to treat, diagnose, mitigate, prevent or cure **any** disease.

It is very important to **never recommend a dosage more than what is indicated on the label**. It is important that everyone follows the dosage recommendations printed on the label or suggested by a healthcare provider. Only recommend Customers to take as directed. The recommended dosage is dictated by Federal regulations.

**Remember, when representing Wellness by Seacret products you cannot claim or imply that they treat or reverse the course of any disease. To state or imply otherwise is contradictory to our mission at Seacret and is against the law. Please be aware that regulators monitor Social Media, Training and Events.**

**So, what can you say?** The average American diet leaves much to be desired. Research has found that there are a number of essential nutrients lacking in our diets. Wellness by Seacret products use a combination of organic ingredients in beneficial quantities to help you enhance and maintain good health. There are many things you can say about supporting the various functions of the body, and you are required to only share or state what is approved on product labeling and in our product profiles provided to Agents. Deviation from those approved documents and use of information not provided by Seacret is not permitted.

**Your support and commitment to the content of this memo will ensure You and Seacret remain a trusted and respected brand with an impeccable reputation. Thank you!**
